

PROFESSIONAL SUMMARY

Software Engineer with expertise in **Python, Node.js, and AI/ML**, experienced in building **enterprise search solutions, RAG pipelines, and LLM integrations**. Skilled in **semantic search, vector databases (FAISS, ChromaDB)**, and cloud deployments (GCP, Docker). Passionate about **retrieval optimization, metadata filtering**, and scalable AI-powered applications.

EDUCATION

- Indian Institute of Technology Bhilai (IIT Bhilai)

B.Tech in Computer Science — GPA: 8.00/10.0

Bhilai, India
Sep 2020 – Mar 2024
- Central Hindu Boys School (BHU)

High School — GPA: 9.1/10.0
- Varanasi, India
Aug 2018 – Mar 2020

PROFESSIONAL EXPERIENCE

- MAQ Software

Software Development Engineer
- Hyderabad, India
Apr 2024 – Present
- Designed and implemented **Kafka producers with Change Data Capture (CDC)** from SQL Server, publishing JSON and Avro events to Kafka topics, reducing ETL latency by **40%**.

Built scalable **Kafka consumers using Spring Boot** for real-time synchronization of reporting data and exposure via RESTful APIs, supporting over **10M records**.

Built LLM chatbot experiences by integrating **MCP Servers** and Fabric **Data Agents** with Power BI Copilot for governed, RLS-aware insights.

Developed fault tolerance using retries and **dead-letter queues** to ensure high availability and message durability in critical data pipelines.
- InterviewKickstart

Backend Engineer
- Remote
Aug 2023 – Feb 2024
- Designed and authored **400+ algorithmic coding challenges** on arrays, trees, DP, and graphs using **Swift, Node.js, and Python** to simulate real-world technical interviews.

Mentored **50+ junior engineers** by conducting code reviews focused on performance, scalability, and maintainability; enhanced team productivity and code quality.

Led a cross-functional team of 10 in developing open-source projects, coordinating feature delivery, sprint planning, and peer collaboration, improving team velocity by 30%.
- Cloudcraftz.AI

Software Developer Intern
- Kolkata, India
May 2023 – Jul 2023
- Architected and developed scalable backend services for a resume screening engine using **FastAPI, LangChain, FAISS, and ChromaDB**, enabling sub-second semantic search on 100K+ profiles.

Implemented zero-shot ML leveraging **OpenAI and HuggingFace embeddings**, asynchronous workflows, **Redis caching**, and containerized deployment on GCP.

PROJECTS

- IntervuPro.AI

GPT-based interview preparation platform with simulation, personalized feedback, and question banks.

Technologies: LangChain, GPT-3.5, Python.
- PythonCF

CLI Python library to interact with Codeforces API for user info, rating graphs, filtered problems, and submissions.

Technologies: Python, Codeforces API.
- IIT Bhilai Lost and Found App

Full-stack application for item tracking and alumni networking.

Technologies: React.js, Node.js, MongoDB.

ACHIEVEMENTS

- Google CodeJam Farewell Round A

Ranked Top 0.5% **Globally Rank 353**.
- ICPC Mathura-Pune Regional 2023

Global Rank: 204.
- CodeChef

Consistently held a **5-Star Rating** since 2023.
- Codeforces

Expert Rating: 1649.
- LeetCode

Guardian Badge(2219), **Top 1% Globally**.
- Hacktoberfest 2022

Open-source Contribution Award.

TECHNICAL SKILLS

- Languages:

Java, Python, C++, C#, Swift, JavaScript, Node.js
- AI/ML & Search:

LangChain, FAISS, ChromaDB, HuggingFace, OpenAI APIs, RAG, Vector Search
- Frameworks:

Spring Boot, .NET Core, PySpark, TensorFlow, MERN, Socket.IO
- Cloud & DevOps:

Docker, Kubernetes, Azure, AWS, GCP
- Databases:

MySQL, MongoDB
- Version Control:

Git, GitHub
